

**PRODUCT SPOTLIGHT**

**Adaptor for Density Monitor**

Adaptor for Density Monitor is specially designed to overcome space constraints on mounting skids. Featuring a 1/2 BSP connecting adaptor, it ensures secure and efficient integration. TIG welded in an angular position, the design enhances durability, precision alignment, and reliable performance in demanding industrial applications and operating conditions.

**INDUSTRY TRENDS WATCH IN 2026**

In 2026, industries are rapidly adopting smart manufacturing driven by IoT, AI, and real-time data analytics to improve efficiency and enable predictive maintenance. Precision engineering and stricter quality standards are becoming increasingly important across sectors.

Sustainability continues to be a major focus, with industries prioritizing energy-efficient designs and reduced emissions. At the same time, the demand for compact and customized components is rising due to space limitations and the need for seamless integration in modern industrial systems.

**LIFE @ SEE**

Building a Safer Workplace with Hands-On Fire Safety Training.

At See Linkages, National Fire Service Week was observed with an engaging and hands-on fire safety training session for employees.
