

INDUSTRY TRENDS WATCH IN 2026

India's oil and gas sector continues to attract investment, with refining capacity, exploration, petrochemicals, and natural gas infrastructure expanding to meet rising energy demand.

For precision manufacturers, this growth is driving demand for high-quality engineered components, advanced machining capabilities, tighter tolerances, and reliable quality systems for critical applications.

PRODUCT SPOTLIGHT

SEAT RING

This series of Seat Rings is manufactured from Stainless Steel Grade 316 and supplied to the Oil & Gas industry. The components are produced on CNC Turn-Mill Centers to meet all specified GD&T requirements as per customer drawings.

Thread quality is maintained using ISO-standard threading tools and calibrated thread plug gauges, ensuring accurate and consistent results.
